

Transactions of the Institute of Metal Finishing

2013, Volume 91

SUBJECT INDEX

Acrylate co-polymer coating, corrosion inhibitor particles, corrosion scribe test, self-healing Additives	283 32, 52, 88, 96, 165, 249, 321, 336	Corrosion resistance	44, 68, 74, 82, 101, 120, 141, 182, 202, 228, 237, 275, 283, 286, 290, 294, 306, 330	Interfacial temperature generation, metal surfaces, coatings, sliding friction, impact	269
Adhesion, electroless Cu, ABS, MnO ₂ based etch	149	Cyclic voltammetry	17, 44, 52, 133, 156, 192, 197	Ionic liquid electrodeposition, deep eutectics, Pd, choline chloride-ethylene glycol/urea, BMIM-Cl-BF ₄ , surface morphology	133
Alloy plating	17, 24, 68, 88, 120, 176, 182, 202, 207, 310	Deep eutectic solvents, metal coatings, electropolishing, etching, metal extraction	241	LED-UV curing paint systems, painted plastics applications, conducting polymers, transport industries, weight/energy saving	301
Aluminium, alloy AA6063-T6, anodised, streak defects, etching	11	Editorial	1, 57, 113, 225, 281	Long wave infrared (dark) radiation/convection, rapid enamelling, energy saving, powder coatings, cataphoretic paints	298
Anodic oxidation	120, 275, 321, 336	Electrochemical impedance spectroscopy	44, 82, 101, 141, 165, 182, 197, 202, 330	Magnesium alloy AZ31, molybdate conversion coating, formation, morphology, corrosion resistance	330
Anodic stripping voltammetry	214	Electrodeposition	4, 17, 24, 32, 52, 63, 68, 88, 120, 133, 165, 173, 176, 192, 202, 221, 241, 249, 260	Magnesium alloy AZ91D, hydrothermal protective film, corrosion resistance, morphology	141
Anodised Al, alloy AA6063-T6, extrusion, streak defects, surface morphology, etching	11	Electroless deposition, transport industries applications, developments	228	Magnetic hysteresis, saturation, coercivity, Co-Ni electrodeposits	17
Atmospheric corrosion, zinc alloy electrodeposits	68	Electroforming, nickel, microprism mold fabrication, current density distribution, hardness, tensile strength	221	Magnetic hysteresis, saturation, coercivity, retentivity, energy density, CoNiMnP-nanocomposite electrodeposit	88
Atomic absorption spectroscopy	17, 24	Electroless deposition, historical review, developments	310	Magnetic properties	17, 88
Atomic force microscopy	149, 182, 192, 241	Electron backscatter diffraction analysis	11	Maskless electrochemical surface modification, Mesmoproc, pcb fabrication, patterned counter electrode	173
Biography	2, 62, 116	Energy consumption, Ni electrodeposition, amine additives, Watt's bath	32	Metal surface cleaning, H embrittlement, ethylenediamine disuccinic acid (EDDS)	286
Cadmium electrodeposition, acid sulphate bath, benzyl alcohol, thiourea, morphology, Langmuir isotherm, radionuclide production	165	Energy dispersive X-ray spectroscopy	24, 74, 82, 202, 260, 330	Micro-arc oxidation, Mg alloys AZ31 and AM60, alkaline phosphate anodising, additives silicate/aluminate/tetaborate, corrosion protection, scratch test	80
Chromium-nickel alloy electrodeposition, trivalent Cr, oxalate, glycine, solution chemistry, deposit morphology	24	Ethylendiamine disuccinic acid (EDDS), metal surface cleaning, H embrittlement	286	Micro-arc oxidation, Mg alloy AZ31, polypropylene post-treatment, corrosion resistance	80
Chronoamperometry	17, 24	Field emission gun scanning electron microscopy	11	Micro-arc oxidation, Mg alloy AZ31, sodium aluminate, morphology, corrosion resistance	74
Cobalt-nickel alloy electrodeposition, chloride bath, nucleation, deposit properties	17	Fouling build-up, coatings, fluoropolymers, polysiloxanes, inorganic-organic hybrid sol-gel coatings	233	Micro-arc oxidation, silane-anodic oxide composite coating, Mg alloy AZ31, morphology, corrosion resistance	275
Cobalt-nickel-manganese-phosphorus nanocomposite electrodeposition, CoNiMnP-BaFe ₁₂ O ₁₉ , magnetic properties, lauryl sulphate	88	Fourier transformation infrared spectroscopy	24, 82, 141, 214	Nickel electrodeposition, 2-butyn-1,4-diol, coumarin, saccharin, cyclic voltammetry	52
Composite plating	88, 96, 202, 207	Glow discharge optical emission spectroscopy	176	Nickel electrodeposition, diamine additives, deposition rate, cathode efficiency, morphology	32
Conference report – 6th International Symposium on Tin Whiskers	63	Gold-nickel alloy electrodeposition, Au K cyanide-sulphate-citrate bath, structure, morphology, current density effect	176	Nickel, electroplating solutions, chemistry, cationic species, conductivity	4
Conference report – Surface World Show	297	Grain size	101	Nickel-phosphorus nanocomposite electroless deposition, Ag microparticles-Al ₂ O ₃ nanoparticles, wear resistance, friction coefficient, self lubrication, microhardness	207
Conference report – TransFair 2013, transportation industries coatings, developments	228	Hardness	202, 207, 221, 228, 290		
Conversion coatings, molybdate, Mg alloy AZ31, formation, morphology, corrosion resistance	330	IMF Gold Medal Award	285		
Conversion coatings, transport industries applications, developments	228	Institute AGM report	59		
Copper electrodeposition, pcb fabrication, maskless technology, Mesmoproc	173				
Copper electroless deposition, dispersed BN particles, sodium lauryl sulphate, surface morphology	96				
Copper film, electroless deposition, ABS substrate, adhesion strength, H ₂ SO ₄ -MnO ₂ -P ₂ O ₇ colloid etch, morphology	149				

Nickel-tungsten-phosphorus electroless deposits, structure, morphology, corrosion resistance, crystallisation, stress, strain	101	Potentiodynamic polarisation	24, 44, 74, 82, 101, 141, 182, 202, 275	Surface morphology	11, 24, 32, 74, 82, 88, 96, 101, 107, 133, 141, 149, 156, 165, 176, 182, 192, 197, 202, 207, 214, 221, 241, 249, 260, 275, 283, 321, 330, 336
Nickel-tungsten-TiN nanocomposite electrodeposition, ammoniacal citrate bath, corrosion resistance, microhardness	202	Printed circuit board fabrication, Cu electrodeposition, Mesmoproc maskless technology	173	Tafel curves	202
Nitriding, transport industries applications, developments	228	Pulse plating	192, 260, 321	Tensile strength, Ni electroform, microprism mold fabrication	221
Nitrotec, enhanced nitriding, low temperature diffusion, wear resistance, corrosion resistance, hardness	290	Pulsed current plasma electrolytic oxidation (PEO), alkaline anodising bath, Al alloys, silicate/aluminate/vanadate additives, silica nanoparticle incorporation, aeronautical applications	321	Thermal extraction automated H analysis	176
Obituary	3, 225, 300	PVD/CVD coatings, transport industries applications, developments	228	Tin electrodeposition, acid Sn(II) gluconate bath, excess SO ₄ , morphology	197
Oxide coatings, mixed metal, thermal decomposition method, RuO ₂ -TiO ₂ , electrochemical properties, O ₂ evolution reaction, electrocatalysis	156	Rapid enamelling, powder coatings, cataphoretic paints, long wave infrared (dark) radiation/convection, energy savings	298	Tin electrodeposits, whisker growth, determining factors, review	249
Paint coatings	120, 228, 237, 301	Reflectance	11	Tin electrodeposits, whisker growth, pulse plating, copper, brass substrates, WHISKERMIT	260
Paint coatings, transport industries applications, developments	228	Review – aerospace coatings, current research, applications	120	Tin electrodeposits, whisker growth, symposium report	63
Paint coatings, urethanes, moisture cured, corrosion protection	237	Review – deep eutectic solvents, metal finishing	241	Trivalent chromium passivation, bath life extension, performance enhancement, ceramic nanoparticles incorporation, selective ion exchange	306
Painted plastics applications, transport industries, weight/energy saving, LED-UV curing paint systems, conducting polymers	350	Review – tin whiskers, growth, electroplated finishes	249	Ultrasonics	
Palladium electrodeposition, ionic liquids, deep eutectics, choline chloride-ethylene glycol/urea, BMIM-Cl-BF ₄ , surface morphology	133	Scanning electron microscopy	11, 24, 32, 74, 82, 88, 96, 101, 107, 133, 141, 149, 156, 165, 176, 182, 192, 197, 202, 207, 221, 241, 249, 260, 275, 283, 301, 321, 330, 336	Wastewater treatment, heavy metal removal, metallic Fe reducer	214
Physical vapour deposition, magnetron sputtering, interfacial contact resistance, hydrogen economy applications, PEMFC bipolar plate, catalysis	294	Scratch test adhesion strength, micro-arc anodic oxide, Mg alloys	336	Wear resistance	120, 207, 228, 290
Plasma electrolytic oxidation, coupled light metal Al/Mg alloys, current conditions	107	AZ31 and AM60, alkaline phosphate anodising, morphology	275	X-ray diffraction	17, 74, 88, 96, 101, 107, 141, 156, 176, 182, 197, 202, 207, 260, 275, 321, 336
Platinum electrodeposition, Q salt bath, pulse plating, niobium substrate, electrocatalytic activity, surface roughness, pulse frequency effect	192	Silane-anodic oxide composite coating, micro-arc oxidation, Mg alloy AZ31, morphology, corrosion resistance	269	X-ray fluorescence spectroscopy	133, 176
Polymer deposit synthesis, homo- and co-polymer, PANI-based, oxalic acid, sulphamic acid, corrosion resistance, EIS	44	Sliding friction, impact, metal interfaces, heat generation	269	X-ray photoelectron spectroscopy	260
		Structure	101, 176, 202, 207, 275, 321, 336	Zinc-iron/nickel/cobalt alloy electrodeposits, chloride bath, corrosion testing, atmospheric, long term	68
